

BIG TECH

CLASS OF '78

JOHN O'CONNELL

SCHOOL of TECHNOLOGY and ANNEX

To Jeff,
A sweet gentleman
who I will never
forget. Thanks for
everything and I wish
you much happiness
forever.
Love Always
Donna
1/8

To Jeff,
One of the coolest
hall aid we ever had
at O'Connell I'll be
back to check up
on all the cool people
at O'C

Your
friend
Juan Anguiano
know as
(John J)

To my darling Cousin
Take care and don't
get anybody in trouble
Love you always
Your
Cousin
Lacy

COOL MUNDO!
BROTHER I CAN'T
EXPLAIN IN WORDS
HOW MUCH A GREAT BRO
YOU'VE BEEN!
WITH MATURENESS,
I DIG YOU!
Miguel Amador

To Jeff, 6-2-78
your a beautiful
person to know.

This Book Belongs to
Jeffrey DeLotto

to bad they all
ain't like you too.
I love you too.
Good luck. Hope to see
you around

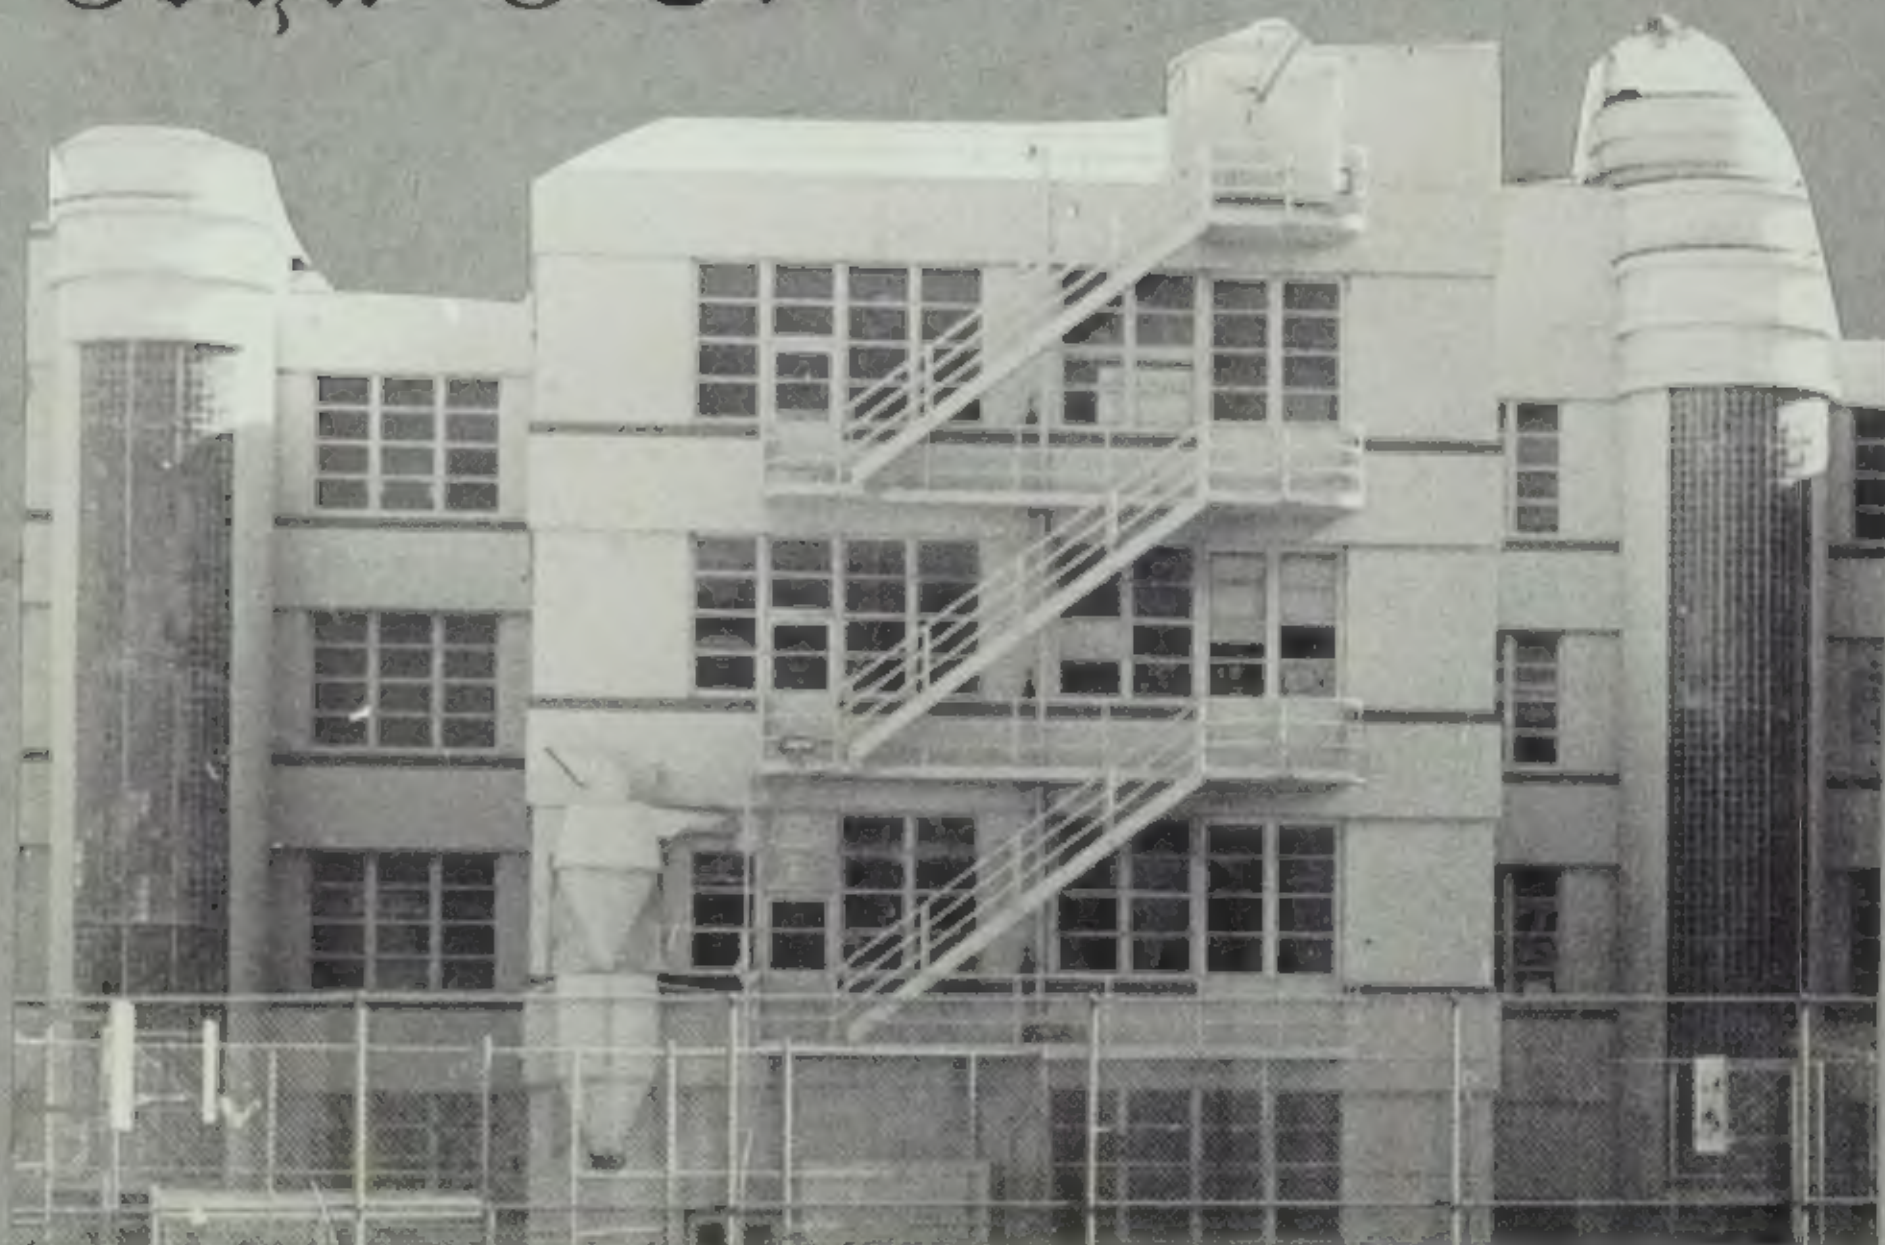

Love Always,
Linda R. Henegans

John O'Connell School of

and
Annex

Dedication

This issue of BIG TECH, John O'Connell, O'Connell School of Technology's 1978 yearbook, is dedicated to myriad nice, friendly, kind, cooperative persons, but basically it's a tribute to those pictured below.

To Beryl McGrath who came to O'Connell ten years ago and has continually made it a better place because of her competency, friendliness, cooperativeness, concern, and presence who is leaving at the end of this school year BIG TECH is primarily dedicated.

To Roberto Gamino who graduated from O'Connell in John Bandvik's Trade Drafting class six years ago who has since graduated with honors from San Francisco State University, returned as a member of the O'Connell faculty using his technical, artistic, and supervisory prowess on Carlo DeLuca and Gordon Woo to produce our yearbook who is the obvious candidate for faculty sponsor next year for the yearbook, BIG TECH is secondarily dedicated.

To the computer, fondly named by Beryl McGrath and Mary Mayfield as "Itsy" of which itsy's services have been made available to BIG TECH's staff by Principal Harington and Warren Toney thus saving us hours, even months of gruelling necessary drudgery, BIG TECH is also dedicated.

Naturally, to every student, faculty and staff member of Big O'C and the Annex, every administrator, everyone who's bought a copy of BIG TECH or who's run an ad, a measure of dedication and a great deal of gratitude is rendered.

To particular persons the majority of whom we hope to name on the "Acknowledgment" page dedication and gratitude is aimed. This naturally has to include the many O'C Annexers who were the epitome of cooperation in their posing on the following page.

We could go on ad infinitum dedicating and being grateful; so we had best return to our primary object.

When there was some question about there being a yearbook this year because of last year's results, Mrs. McGrath made sure there was one, and when the question of its solvency arose, she demanded to be the first purchaser. Whenever assistance or encouragement was needed, she was always there to render it. If this necessitated sacrifice on the part of her own work being done, so had it been.

This June, Mr. and Mrs. John McGrath pull up stakes and transplant their roots from San Francisco to Sonora. As badly as Mrs. McGrath will be missed here at O'Connell, the inhabitants of George Washington High School will feel a longing for the presence of Mr. McGrath. To the pioneering McGrath's as they journey toward Sonora and the mother lode country, the very best wishes are extended for continued happiness, good health, and a big strike of the very best ore.

Friday, March 17, 1978
12:45 PM The Annex

Built in 1934, what was formerly known as Samuel Gompers Trade School is now the Annex to OC Tech. A happy addition for big O'Connell is the Annex with its keen, cooperative, energetic, intelligent, effervescent, ambitious, spirited students and their teachers who'd better be the same or, but they are.

Part of the Redesign Plan and yet put into effect before other schools of the city, O'Connell and The Annex are good examples of how the new system is going to work extremely well.

According to computerological evaluations, 93.7% of the Annex came out to the yard for the picture prior to going to the Spirit Week dance. All of them gave 103.7% in their effort to make "OC TECH" work.

Principal's Message

The Roman poet, Juvenal, once wrote that "our prayers should be for a sound mind in a "sound body." A school principal could wish no less for his students. You and I, therefore, are fortunate that the curriculum in John O'Connell School of Technology challenges and develops both mind and body. In the shops, you learn not only the techniques that make entry to a trade possible, but also the technology that makes advancement and promotion probable. Take a look at industry, and you will note that the man who knows how, works for the man who knows why. Vocational Education gives you a unique opportunity to find the answer to both the how and the why. I am confident that you will not let that opportunity pass. Your academic curriculum complements your vocational training. It may not seem so now, but it is no less necessary for your complete education.

To the graduating seniors, congratulations on a race well run. The immediate prize is your diploma, but the greater prize awaits you -- a successful career in industry or higher education. Your graduation is truly your commencement. You bear the mark of John O'Connell. Wear it well, and proudly.

To all our students, the entire O'Connell staff and I are proud that your coming to O'Connell was your own individual choice. We hope we have proved worthy of your trust.

Robert Harrington
Principal

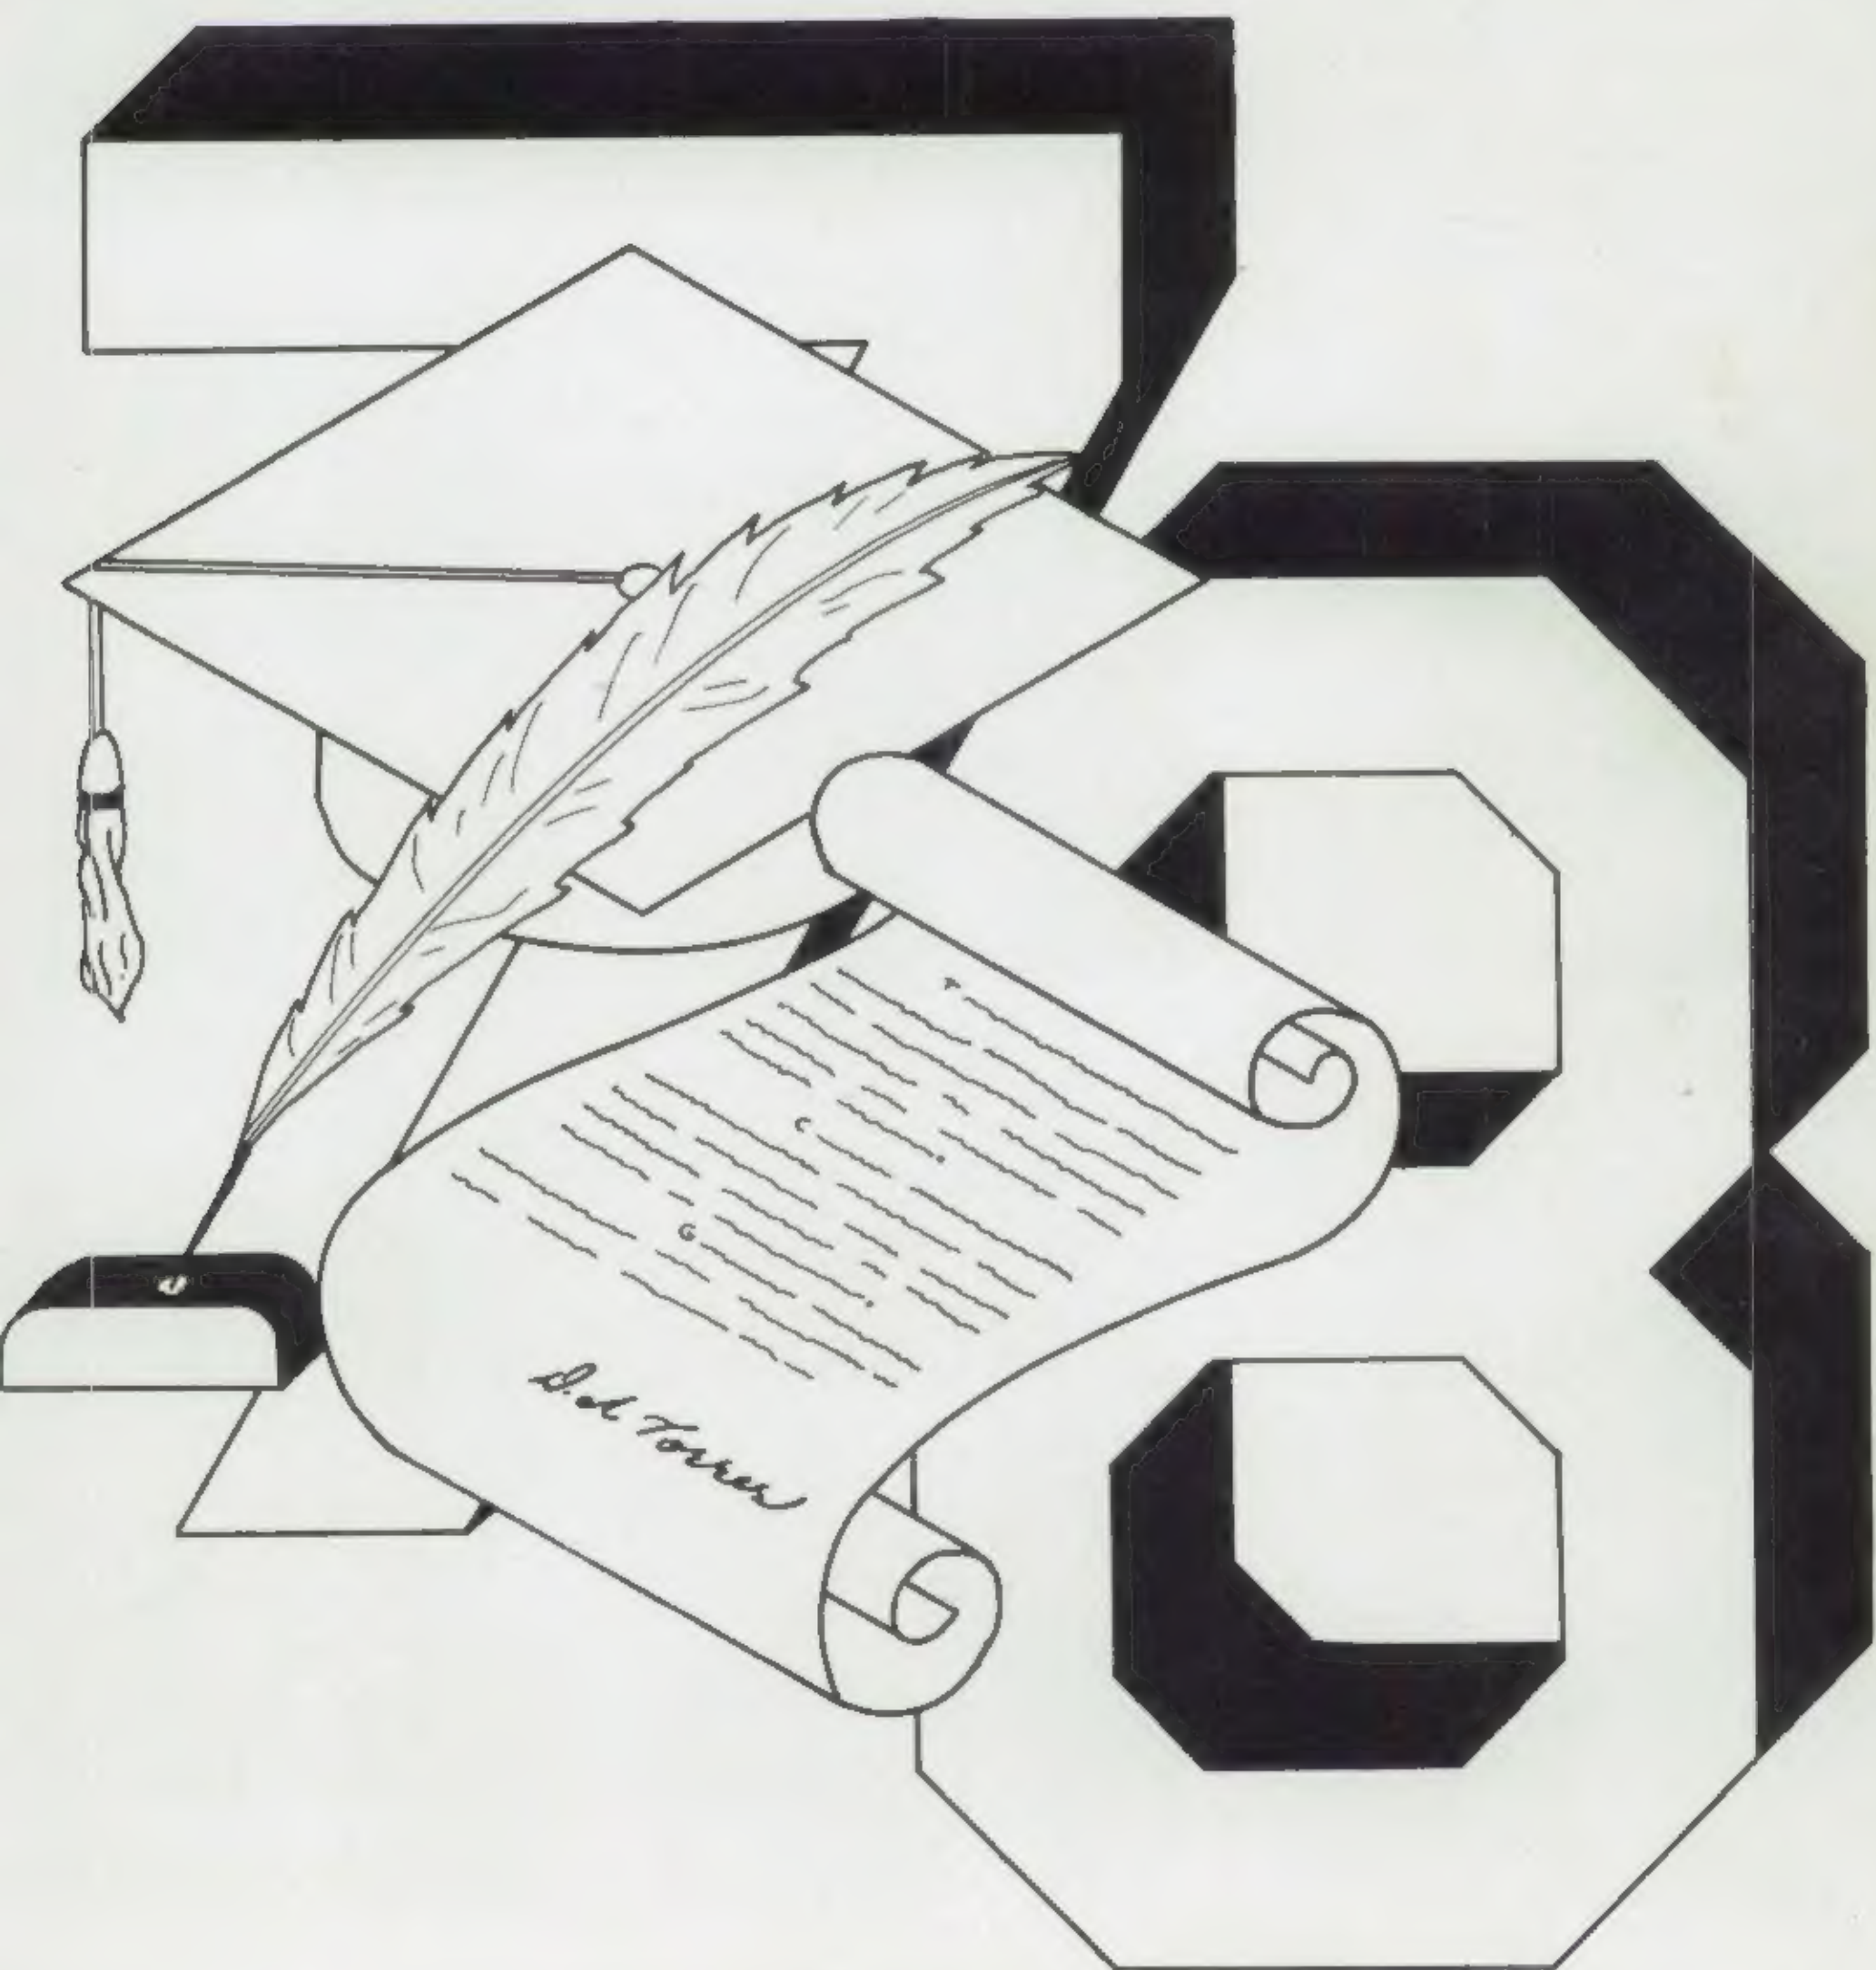

President's Message

Both the present student body president, Deborah Oden, and her predecessor, Victor Lee who left in February of this year to go to City College, have been actively involved in O'Connell since their arrival. Both would be good examples to follow for other students and adults. Constructivism would be the key word in describing the attitudes and philosophies of both of O'Connell's 1977-78 student body presidents. Both enjoy working, doing, accomplishing. O'Connell has been and will be a better place because of the living message presented for others to heed by Deborah Oden and Victor Lee.

Deborah Oden
President

Watch Out For Our Team In 78

All-League

For the second year O'Connell's Varsity Center, 6'5" Wayne McDaniels was selected to the Academic Athletic Association All-League team by coaches around the league. This past season, Wayne led his team in scoring, and the AAA with a 28 point average. Wayne is also one of the most recruited prep players in Northern California. He has already been contacted by Kentucky and Santa Clara. Right now, Wayne is waiting for which college he will go to this Fall.

One of Wayne's other achievements this year is he's been chosen twice as "Electo Athlete of the Week" for San Francisco.

Coach Robert Bondanza says, "If Wayne can improve his defensive play, he will be an outstanding basketball player." Bondanza also admits that Wayne should have been named outstanding this year, but he didn't broken his leg last summer.

Photo reproduced through the courtesy and generosity of Ed Orloff, assistant managing editor of the photo department of the San Francisco EXAMINER.

Wednesday, March 15, 1978 The Parking Lot 2:45 PM

On this day at this time at this site school had been dismissed early, all were
to remove their cars so a "Spirit Week" school picture could be taken. As
can be seen most of the cars in what is usually a crowded parking lot complied.
As can also be seen, not all of O'Connell's 1100 students came out to the lot
when they were given the time to do so, but that's ok. Lots of the students
did and they were the ones we're very happy to have included in our picture.
It would have been nice if the other 52.8 percent of the student body had
included.

and we
would like
we're disa
or asking
or asking
anything.

O'CONNELL

We certainly would like to, but
it's almost difficult to name all
the O'Connellites who
up, but we can spot Mrs.
on the left and Mr.
in the right, holding up

A D U L T S

The majority of all chronological adult classes are radio-television repair where it is the rule, rather than the exception for the graduate to become employed as a radio or television engineer or comparable position. Also extremely popular for adults although seniors are entitled to enroll is Grocery Clerk Training. Here the graduate is usually hungrily sought by Safeway, Lucky, Alpha Beta, QFI, A & P,

Ralphs or any number of super outfits who are looking for super employees.

What the future holds for O'Connell with regards to the administration of the adults, the annex, the community college housed classes, the Redesign plan, ROP, and numerous other projects and plans will be interesting to watch. But if the innovation and the change bring about as smooth

an operation as is now being witnessed with two different schools transacting under one roof, we know the future bids for the best of all possible times.

Dr. Secil House, Principal

Approximately 34.3% of O'Connell's enrollment is comprised of adults. Beginning this school year, all adults have been under the guidance of Dr. Secil House, newly arrived to our school.

Adults can be found in almost any O'C shop and are always a tremendous part of that shop. They are a gratefully stabilizing influence and are respected by teacher and other students alike.

Prior to Dr. House's arrival, adults like annex students, sophomores, juniors and seniors were under the jurisdiction of the principal of what had been John O'Connell Technical High School and Vocational Institute until 1973 when it became the School of Technology.

The position under Dr. House makes the adults a separate entity within the confines of O'C, but the unity of the total is by no means diminished and actually might be intensified.

The legal definition of an adult is one who has reached the age of a majority but academically it is one who has received a high school diploma or the legal definition. For those who've passed the Qualifying Examination one at 16 can be considered an adult and receive the benefits earned thereby.

GYNASTIUM

During "Spirit Week" the difference between O'Connell and most other high schools in the City was brought to notice. Unlike most of the other schools in town, where the girls get to compete against their peers in basketball, softball, volleyball, gymnastics, track, and swimming, at O'Connell the girls get to play the male faculty in volleyball, basketball and softball.

Being deprived of peer competition didn't seem to bother the girls too much, and they put up a fine showing and depending upon which score keeper one talked to beat the faculty who are comprised of men with lots of chronological experience and a goodly amount of the same athletically.

Seeing the girls in action on the volleyball court, we know there is plenty of talent to be found there and it shouldn't be that long before that ability can be put on the floor and the field with the other schools and the females in basketball, volleyball, softball, gymnastics, swimming or whatever of O'Connell well will be able to say, "We're number one."

SPIRIT WEEK IS COMING!

Mission Optimist Club

Friend of Youth

Congratulates

O'Connell's

Class of '78

On 21st and Treat across street,
O'Connell the Superior Bakery
Family sends its congratula-
tions to O'C Tech's graduates
and wishes them the best of
luck and God's speed in the
future. They are grateful
to them for their patron-
age of the past and hope
they will return often.

Congratulations on
Graduation

Acknowledgements

Since Itsy has informed us BIG TECH is 79.483% photo and the remainder contains few words, we shall not spend too much time in lauding our writers.

For the photographs not enough can be said for Bosco Studio, Nery Ordonez or Cesar Arras. Every photographically qualitatively acceptable photo is credited to them. The fuzzy, flat, contrasty, uninteresting ones shall be credited to others.

The actual compilation of BIG TECH where many hours are required of pasting, laying out, trimming, deciding have to go to room 404 where Mr. Gamino, Carlo DeLuca, and Gordon Woo spent many un-

complaining hours under the pressure of inexorable deadlines to produce the finished product.

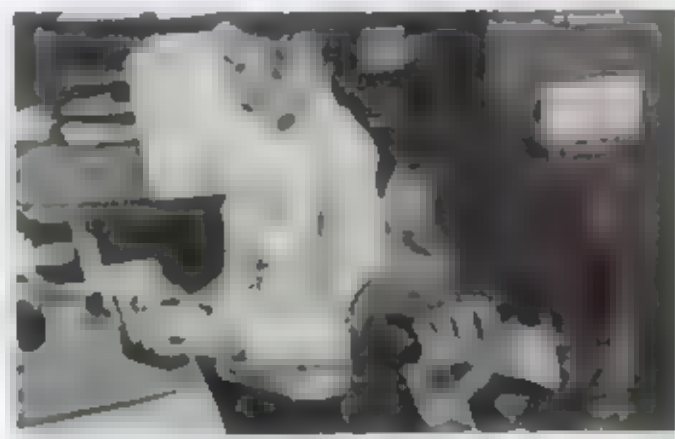

In this same room in the morning under the guidance of Mr. Bandvik, Chester Cheng and John Gibbs tolled many hours in producing any and all requested pieces of art work.

Sherylyn and Kathy spent many an hour at the Annex selling the BIG TECHs. Mary Lou and Eida spent much time in acquiring advertisements for us. Rosie, Andrea, Angie and Nick tolled long for BIG TECH. Many others helped immeasurably. It would be nice if everyone could be acknowledged, but that's impossible.

We do have to mention the cooperation of Mrs. Robinson and her class whose assistance was momentous and whose cooperation is truly appreciated and especially Dorothy Schembri who has to be known as the Editor of BIG TECH for if anyone's assistance was irreplaceable it has to be Dorothy's.

To everyone who bought a copy of BIG TECH, to everyone who bought an advertisement, to all who helped, to everyone who refrained from tearing down a sign advertising BIG TECH, we render you our thanks.

Eugene Bleck,
BIG TECH advisor

To my #1 boy

I am going to miss
you over the summer
but I know I will
see you next year I
in the meanwhile I
care.

Love Always
Syl A

To Jeff.

It was fun this
last year taking you
around with
you. Take care and be good!

Love Rose Carrillo

78

To my son Jeff,

Life is a journey and is
a gift. Don't waste it.
Spend it on things that
you like. Don't let
life pass you by. Live
it up. Be happy.
Love Mom
